**DETAILED ACTION**

***Claim Rejections - 35 U.S.C. § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 25, 26 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Luttmner.

Luttmner, U.S. Patent 3,795,037 discloses an electrical connector. As shown in Figure 3, the connector comprises an elastomeric material 21. Conductive resilient members, such as 10 and 40, which are shown in Figure 2 are also embedded in the connector.

***Allowable Subject Matter***

Claim 27 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1, 3 - 6, 9 - 21, 72 and 74 are allowed.

Art Unit: 2822

***Response to Arguments***

Applicant's arguments with respect to claim have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hembree et al., U.S. Patent No. 6,598,290, discloses a spring element.
